

The logo for tarics+ features the word "tarics" in a bold, lowercase sans-serif font, followed by a plus sign inside a white circle. The background of the entire page is a high-angle, close-up photograph of turquoise ocean waves crashing onto a dark, pebbly beach, with white foam visible in the foreground.

MULTI VENDOR DISTRIBUTION PLATFORM

The logo for Be consists of the letters "Be" in a white, elegant serif font, set against a dark teal rectangular background.

Optimise your market data management with tarics+

PRODUCT OVERVIEW 2026

The logo for Software Made in Germany features a horizontal bar with segments in black, red, and gold, positioned above the text "SOFTWARE MADE IN GERMANY".

SOFTWARE MADE IN GERMANY

A SEA OF DATA DRIVES THE MARKETS

Market data plays a pivotal role in the capital markets value chain, underpinning nearly every trading decision and serving as a vital link between market participants. Unsurprisingly, the associated costs are significant.

With the tarics+ Multi-Vendor Distribution Platform, we empower our customers to integrate data from a wide range of providers and other sources into their applications using a unified interface and a cross-vendor authorization framework.

This approach enables organizations to choose the data that best fits their business needs, integrate it cost-effectively, and ensure compliance with all relevant regulatory requirements.

**REDUCE COSTS,
GAIN FLEXIBILITY,
INCREASE QUALITY.**

USE TARICS+

OUT-OF-THE-BOX INTEGRATION

tarics+ features out-of-the-box integration with leading market data providers such as **Bloomberg**, **LSEG** and **SIX**. Our highly flexible APIs also enable the integration of practically any external or internal source. Many typical market applications have already been integrated for the existing tarics+ user base.

The platform also has an **Excel** plugin for the integration of data in Office applications.

DEPLOYMENT OPTIONS

tarics+ can be hosted **on-premises** or as a **cloud** solution (SaaS). Users benefit from flexible licence and support models that are customized to meet their specific needs. Our SaaS solution fulfils all relevant standards regarding information security, business continuity and the regulatory requirements.

TURNING COMPLEXITY INTO SEAMLESS SIMPLICITY

MANAGING MARKET DATA IS COMPLEX – AND COSTLY

Traditional market data environments, often built around vendor platforms with multiple data sources and consumers, face significant technical limitations. Using third-party data on these platforms typically results in additional licensing costs and reduced flexibility.

Authorization management for third-party content is frequently cumbersome, and control over data usage remains limited. This lack of transparency adds risk and administrative overhead.

The total cost of ownership (TCO) in such heterogeneous landscapes is substantial. It includes not only direct costs like licenses and infrastructure but also indirect costs such as personnel required to maintain legacy systems. Meeting new demands—such as regulatory changes—is often time-consuming and expensive. Additionally, the heavy reliance on proprietary interfaces drives up development and maintenance costs significantly.

SIMPLIFY YOUR MARKET DATA LANDSCAPE WITH TARICS+

tarics+ streamlines complex market data architectures by serving as a central hub for all inbound and outbound data flows. External and internal data sources connect easily to the platform using standard connectors or the tarics+ API, enabling seamless and efficient distribution to all consuming systems. To ensure full control and compliance, tarics+ features a robust authorization framework that supports even the most intricate licensing models – helping you stay aligned with contractual obligations and regulatory requirements at all times.

- + FLEXIBLE**
Obtain your market data from various vendors and any other sources.
- + COST-REDUCING**
Choose the vendor with the best cost/performance ratio. Eliminate or reduce additional usage fees, view charges, fees for derived data, redistribution fees, multi-side costs, fees for internal contribution, unnecessary bundles.
- + AUDIT PROOF**
Get a comprehensive overview with our authorization module and control all data distributed in your organisation.
- + EFFICIENT**
Validate, transform, format and prioritise all data with predefined rules; prioritise and control data on instrument level.

SUCCESS FACTORS
